THE PREMISE

Consulting firms sell structured process.

- Not proprietary data. Not secret frameworks. Not magic analysis.
- Process. Applied to your problem. Formatted into slides.
- Claude Code has structured process built in.
- Here are 7 deliverables you can stop paying for.

DELIVERABLE 1

Market Sizing Model

What consultants do	Claude Code approach
Interview industry experts, triangulate top-down and bottom-up estimates, build a TAM waterfall in PowerPoint	**Pull industry data via web scraping + FRED. Build top-down (macro → sector → segment) and bottom-up (customers x ASP x penetration) models. Cross-reference against public company disclosures for sanity check.**

Data sources: FRED, SEC filings (competitor revenue disclosures), industry reports (web scrape)

Claude Code features used: MCP servers, sub-agents (top-down + bottom-up in parallel)

DELIVERABLE 2

Competitive Landscape Matrix

What consultants do	Claude Code approach
Map 10-15 competitors across 6-8 dimensions. Plot on a 2x2 matrix. Highlight white space.	**Pull public filings for all competitors. Extract revenue, margins, growth, product focus, geographic mix, customer segments. Auto-generate the comparison matrix with rankings per dimension.**

Data sources: SEC EDGAR (10-Ks across peer set), earnings transcripts, company websites

Claude Code features used: Sub-agents (one per competitor), MCP servers

DELIVERABLE 3

Industry Deep Dive

What consultants do	Claude Code approach
50-page report covering market dynamics, regulatory landscape, technology trends, key players, and growth drivers. Takes 3-4 weeks.	**Sub-agents each tackle one section in parallel: market dynamics, key players, growth drivers, technology trends, regulatory environment. Pulls from filings, transcripts, FRED macro data, and news. Converges into a structured report.**

Data sources: EDGAR, FRED, earnings transcripts (web scrape), news

Claude Code features used: Sub-agents (5 parallel research streams), skills for formatting

DELIVERABLE 4

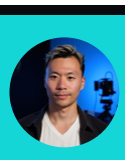

TAM / SAM / SOM

Analysis

What consultants do	Claude Code approach
Define total addressable market, then narrow by geography/segment/product to serviceable and obtainable. Usually 3-5 slides with waterfall charts.	**Build three-layer funnel from public data. TAM from industry reports + FRED. SAM filtered by company's actual geographic and segment reach (from 10-K). SOM estimated from current revenue + market share vs. peers.**

Data sources: FRED, SEC filings (revenue disclosures, segment data), competitor filings

Claude Code features used: MCP servers, sub-agents (TAM + SAM + SOM in parallel)

DELIVERABLE 5

Management & Leadership Assessment

What consultants do	Claude Code approach
Background checks, interview references, assess track record. Often subjective and relationship-driven.	**Pull proxy statements for comp structure and insider ownership. Score management credibility: compare forward guidance to actual results across 8-12 quarters. Flag insider selling patterns. Analyze tone shifts in earnings call language over time.**

Data sources: SEC EDGAR (DEF 14A proxy, Form 4 insider transactions), earnings transcripts

Claude Code features used: Sub-agents (comp analysis + credibility scoring + insider tracking in parallel)

DELIVERABLE 6

Due Diligence Report

What consultants do	Claude Code approach
Multi-week engagement covering financial analysis, competitive positioning, management, risks, and growth outlook. $200K-$500K.	**Run /diligence-checklist skill: pulls filings, builds comps, diffs quarterly filings, scores management, flags insider activity, checks customer concentration, identifies revenue quality issues. Full memo output in your format.**

Data sources: SEC EDGAR (full filing suite), FRED, Yahoo Finance, news

Claude Code features used: Skills (/diligence-checklist), MCP servers, sub-agents (parallel workstreams)

DELIVERABLE 7

Investor Presentation Teardown

What consultants do	Claude Code approach
Analyze a company's investor day or earnings presentation. Identify gaps between the narrative and the financials. Flag questionable claims.	**Pull the investor presentation (web scrape) + latest filings. Cross-reference every claim in the deck against actual financials. Flag discrepancies between management narrative and reported numbers. Score each section for credibility.**

Data sources: Company investor relations (web scrape), SEC EDGAR, earnings transcripts

Claude Code features used: Sub-agents (narrative analysis + financial verification in parallel)
