

RESPONSIVE STRATEGY

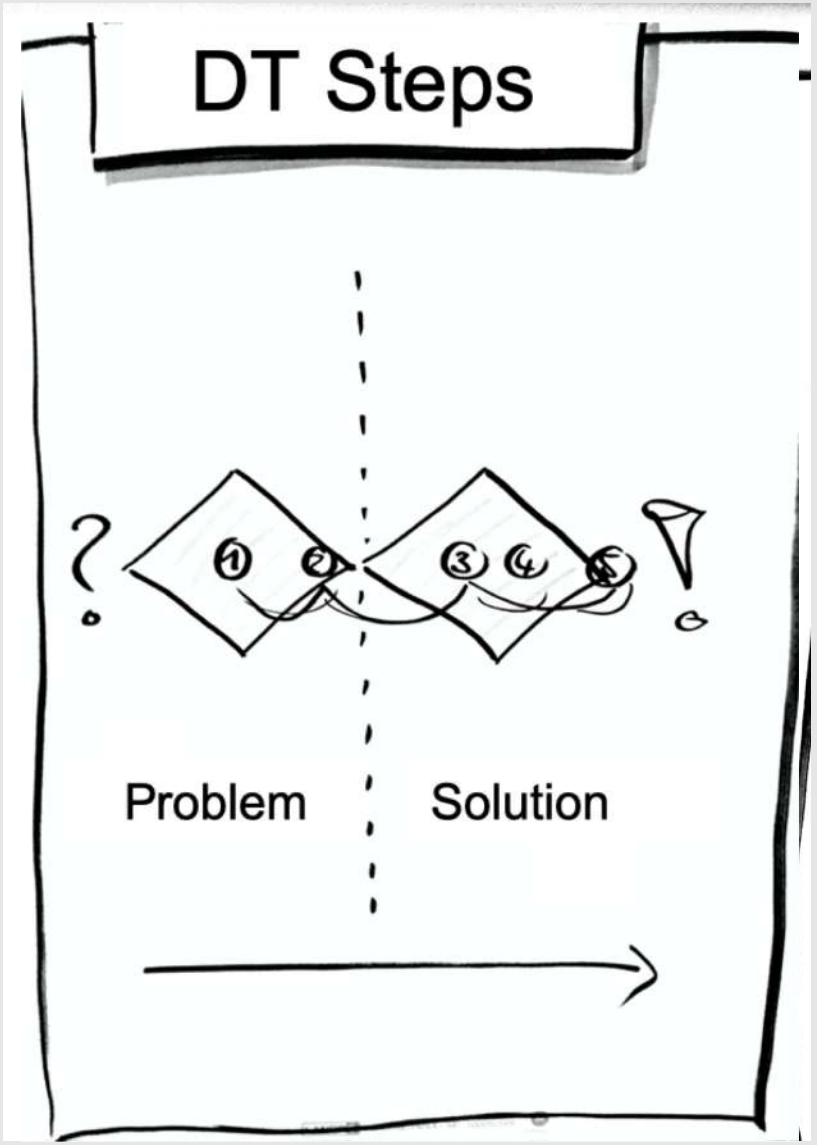

Design Thinking Crash Course

By Julia Lettinger

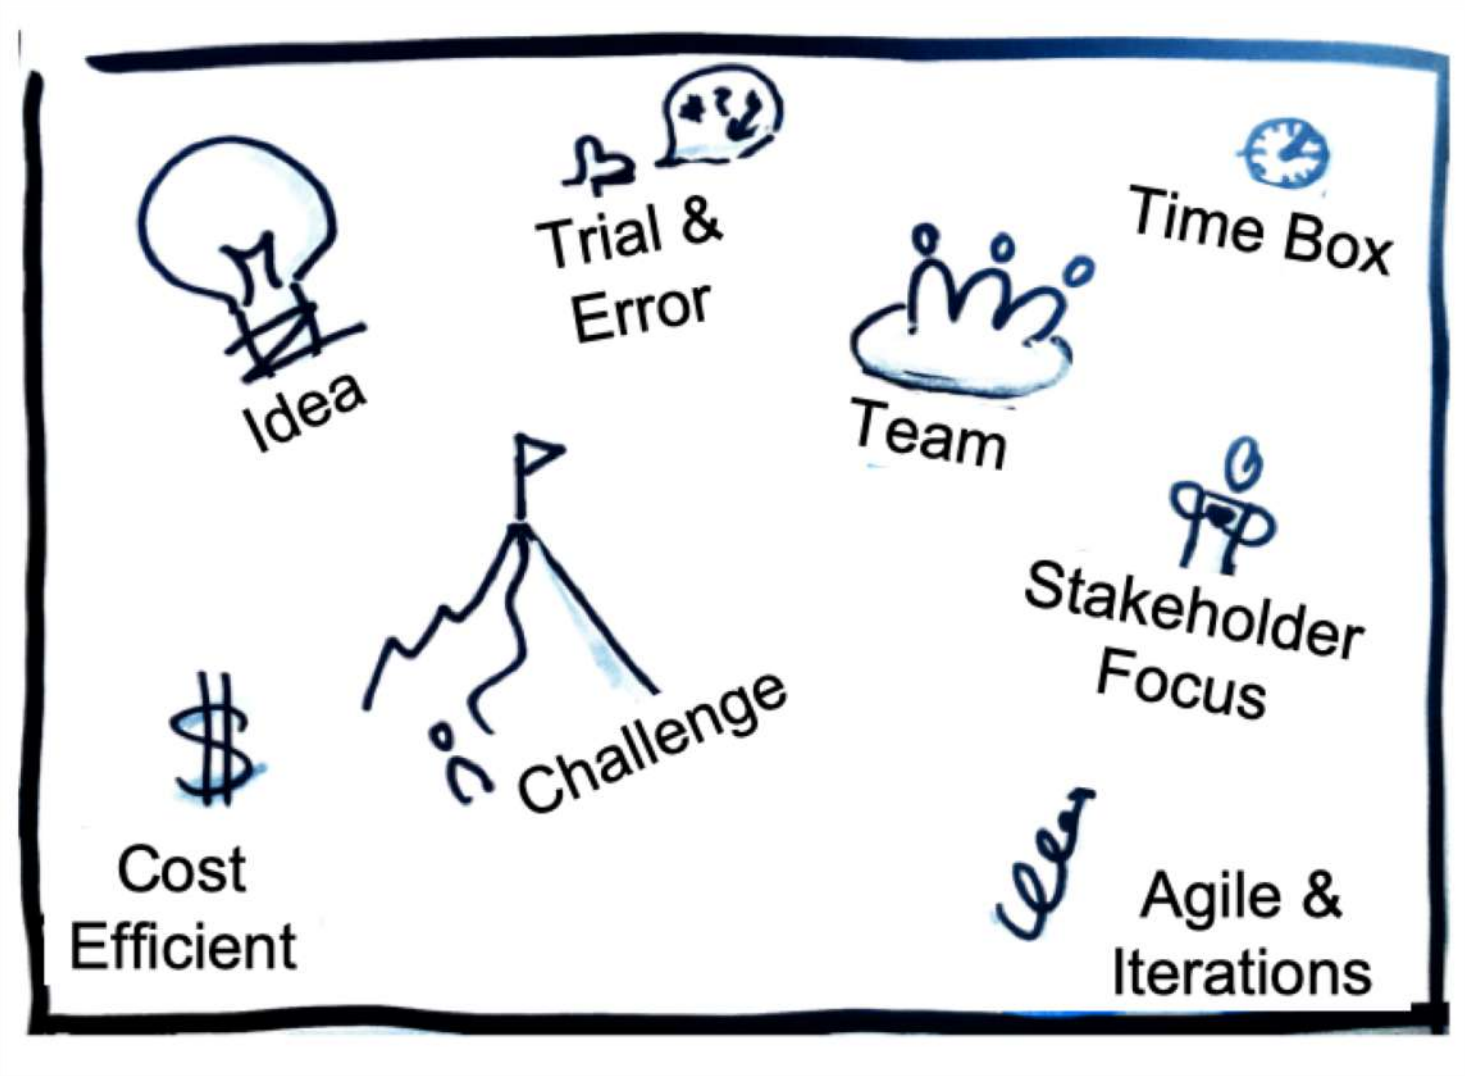

HANDOUT

What is Design Thinking?

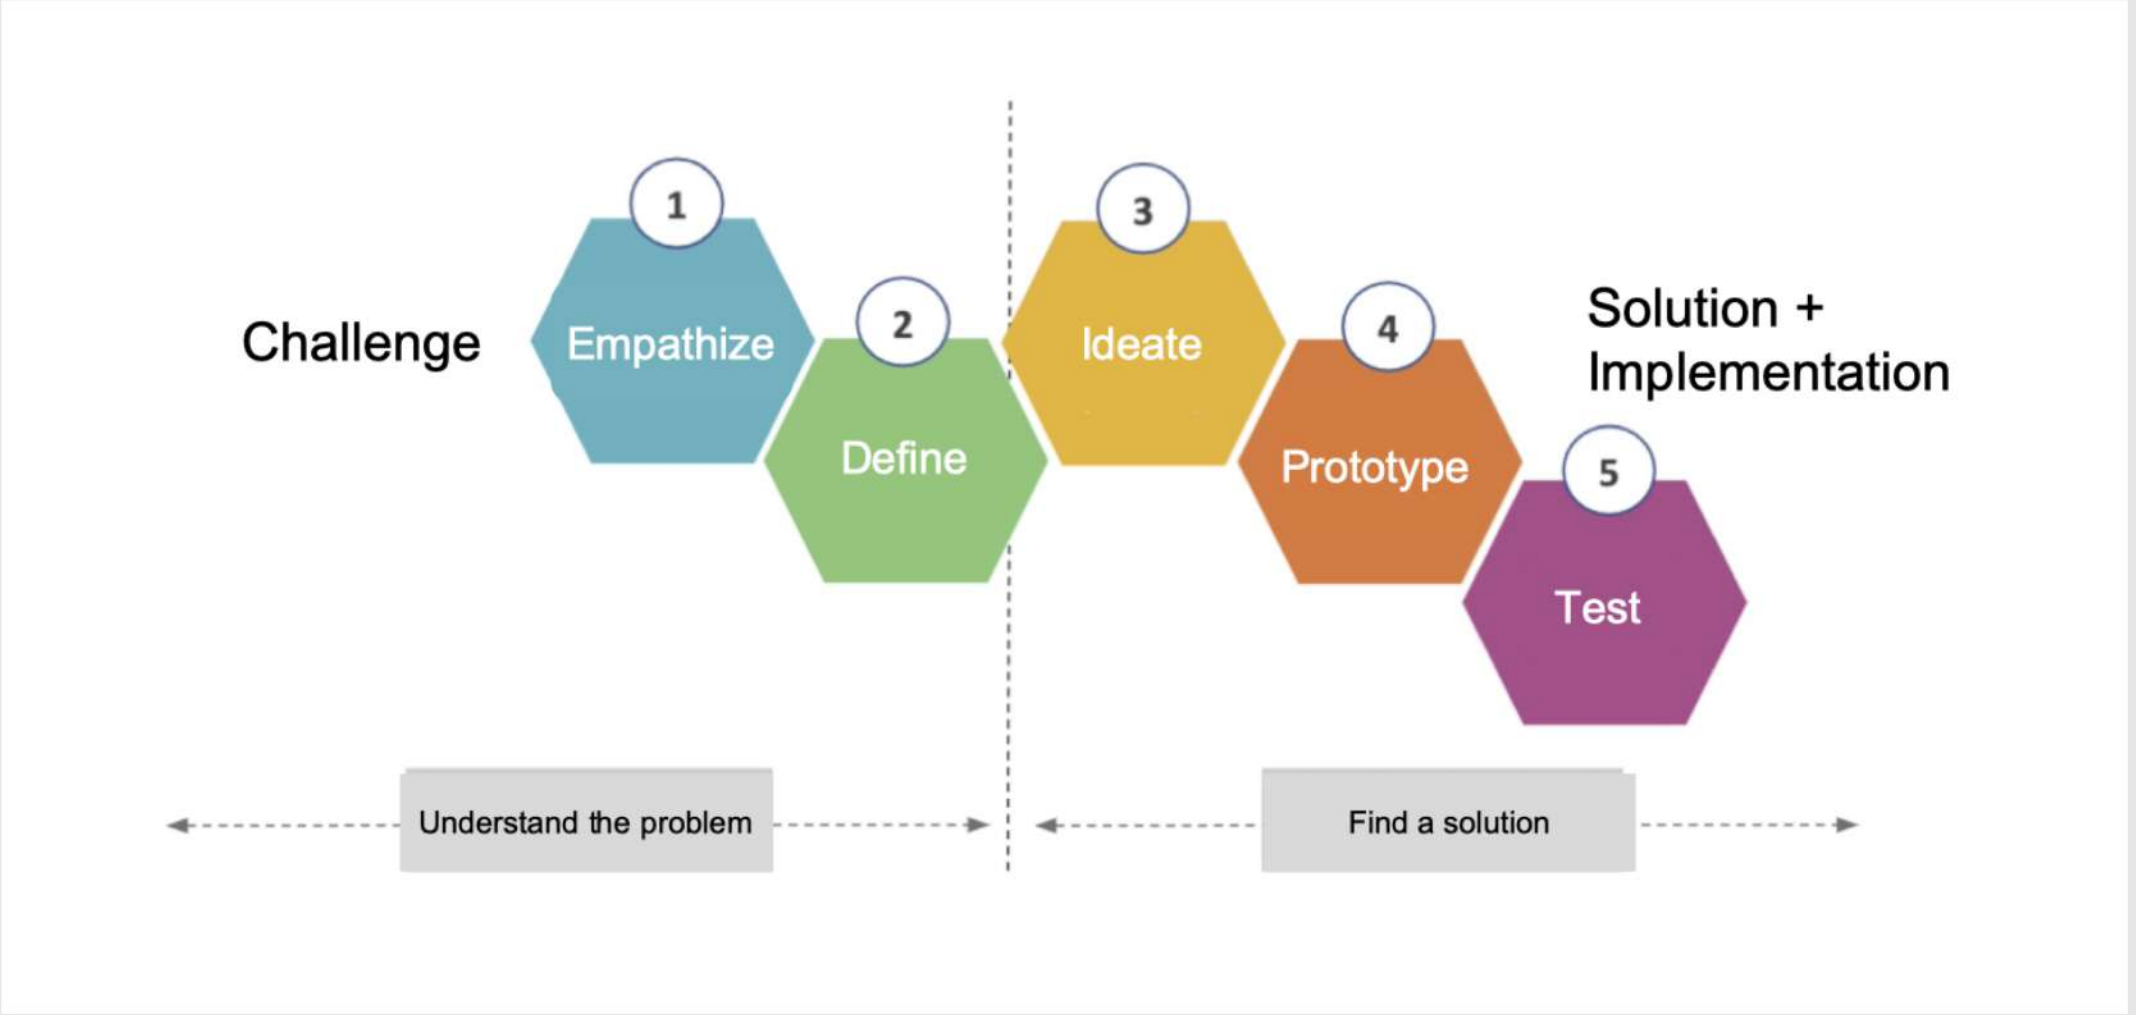

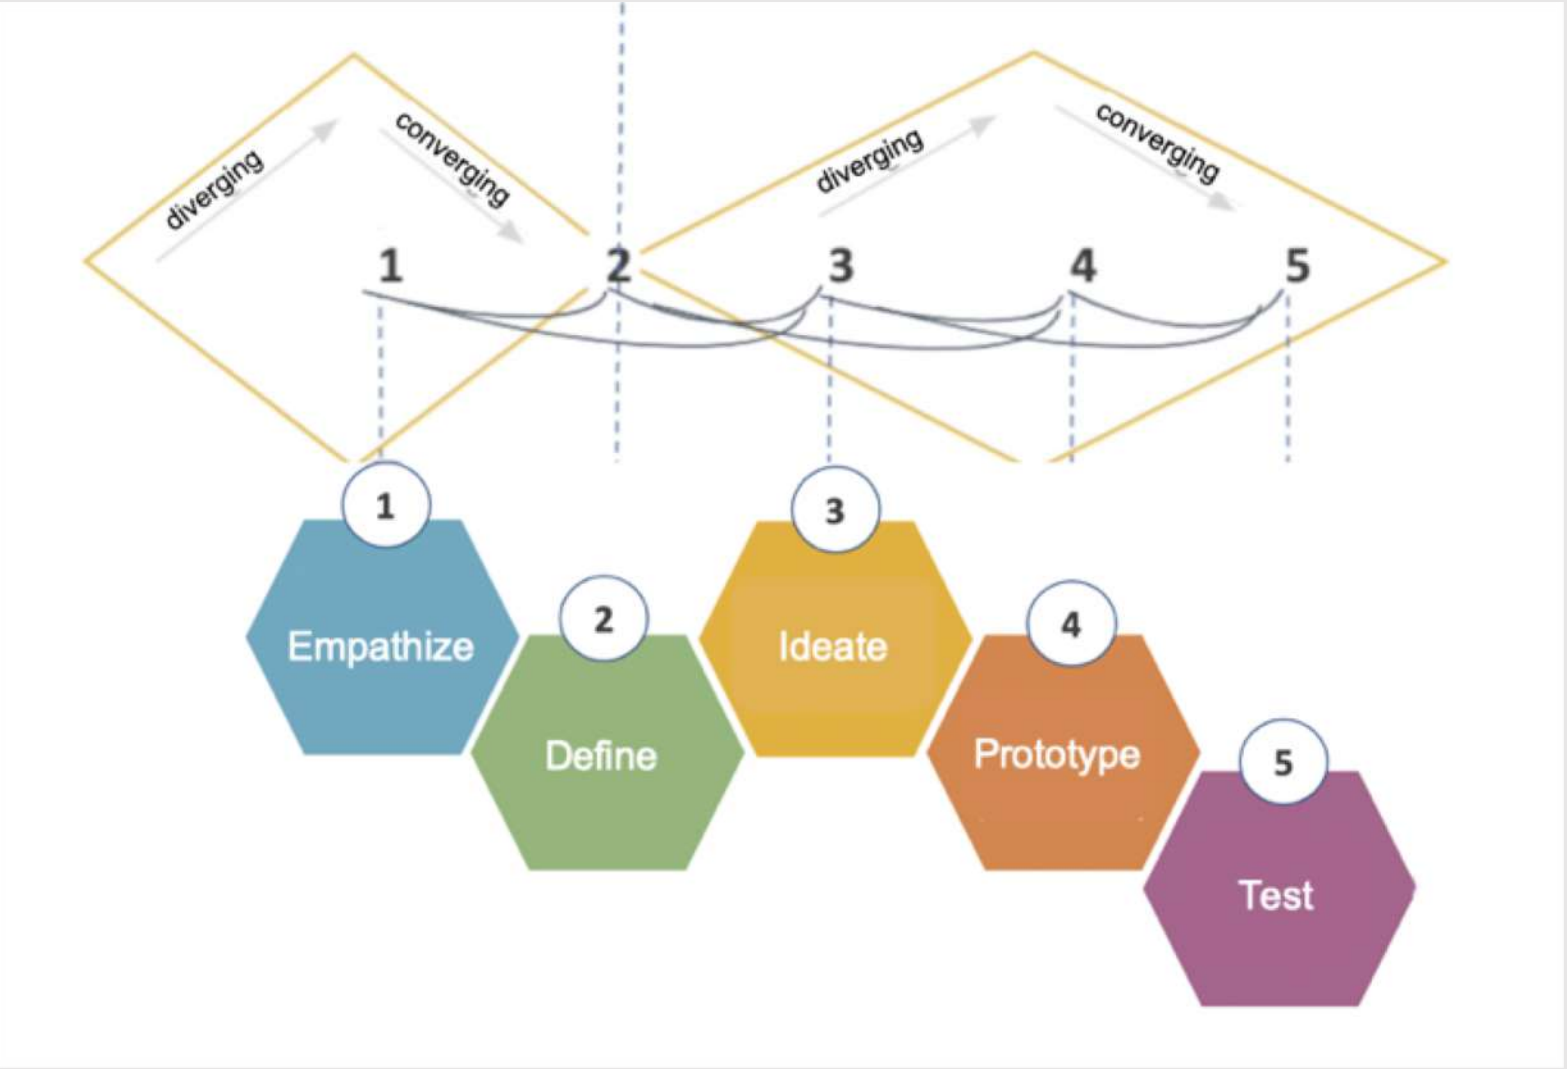

Design Thinking Principles

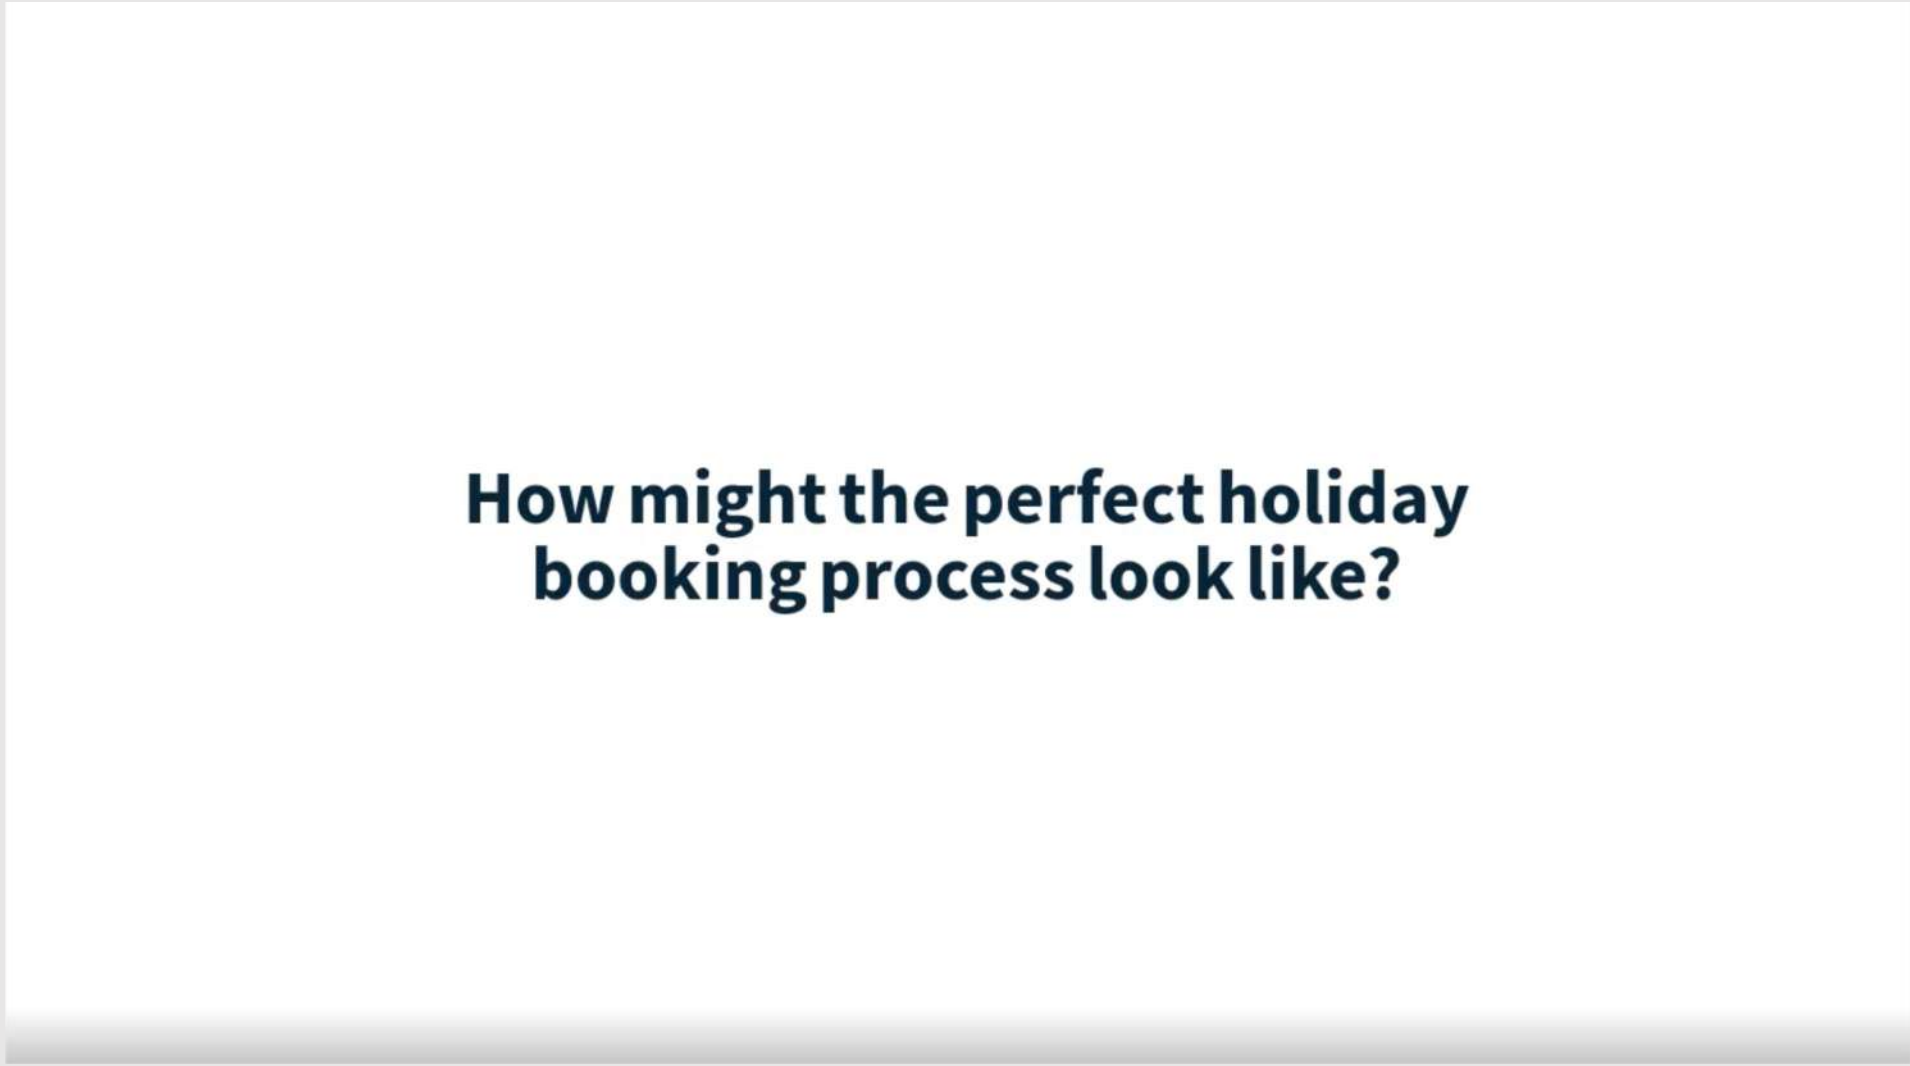

The 5 Design Thinking Steps

The “Double Diamond”

Find a Challenge

1

Empathize

Research, Observe, Collect Insights and Interview

1. Do research
2. Interviews stakeholders
3. Emerge yourself

Analysis Template

Market or Situation Analysis

Understand your market or the situation

Before you start a new activity, be it a new product, want to update your website or want to change a process, I recommend you to analyze the market (or the situation) and the target group or stakeholders (can also be internal).

You understand the market (the situation) when you are able to answer the following questions *:

1) What problem are you solving with your product, service or process?

2) How does your (future) customer (also internally) solve the problem at the moment?

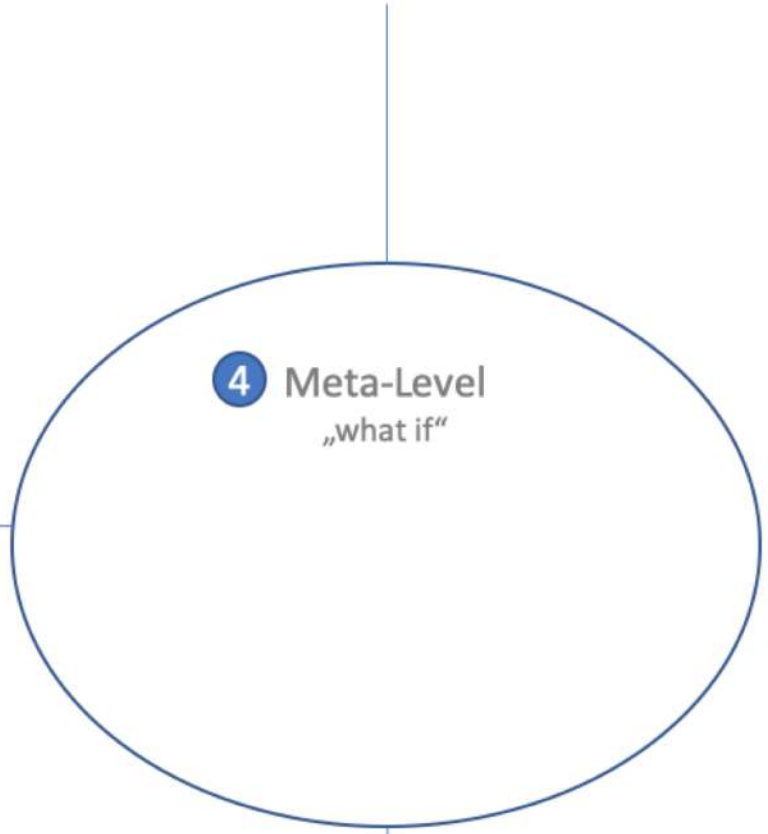

3) What are the (typical) customers or your stakeholders?

4) Do you need others (e.g. suppliers) for your solution? If yes, who? What do you know about them?

5) Who are the competitors in the market? Alternatives to your process?

6) What are the general trends and developments?

Interview Template

1 General Questions

„What does ..... mean to you“
„What do think of .....?

2 Experience Questions

Day-to-day, positive, negative and/or surprising experiences
-> Ask 5 x “Why?”

4 Meta-Level

„what if“

3 Specific Questions

„How was it when.....?”

5 Wish Questions

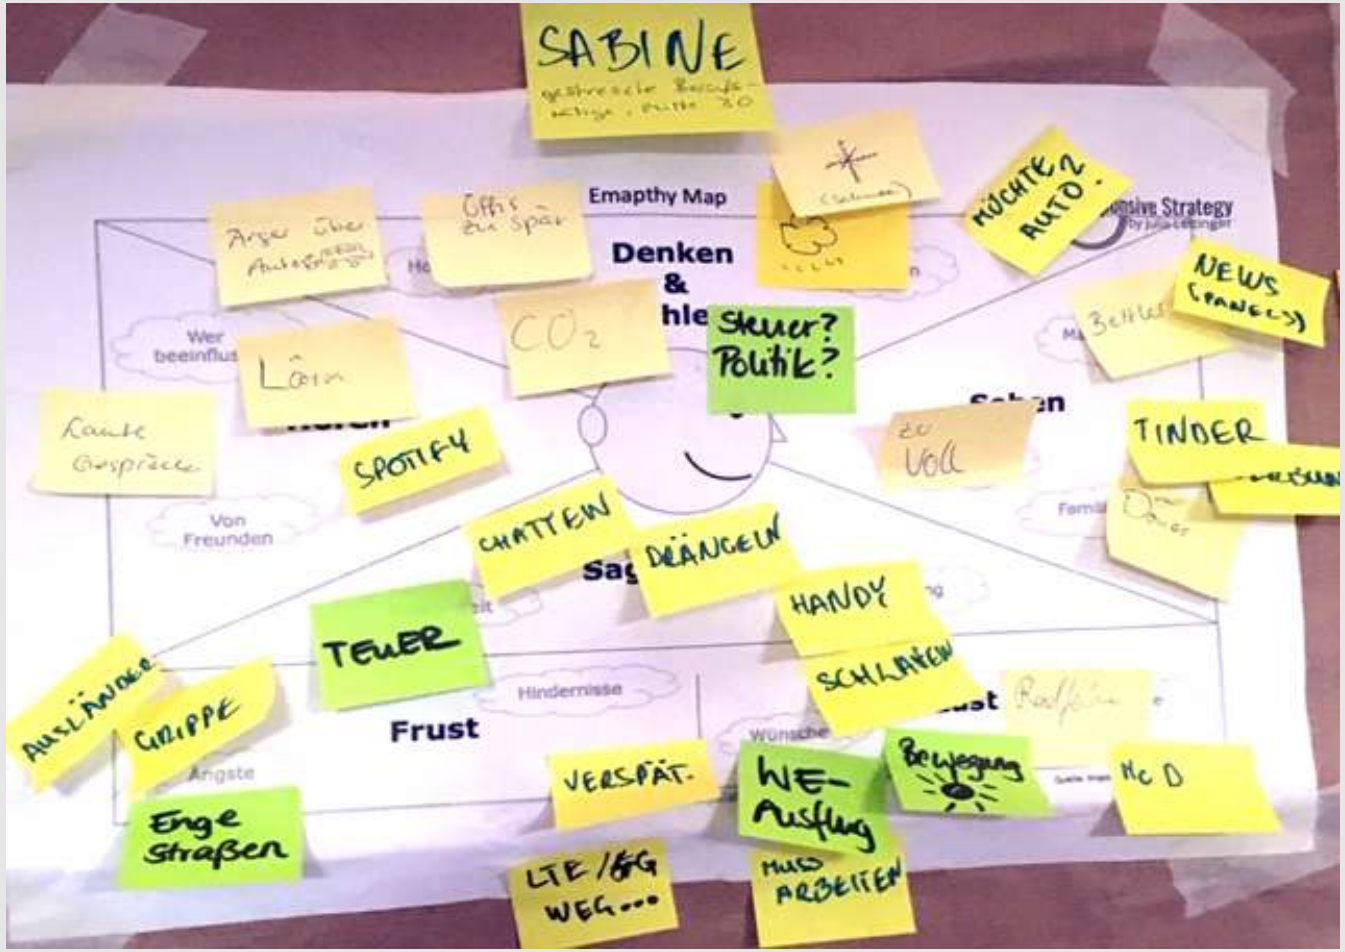

What would you wish for in relation to ...?

2

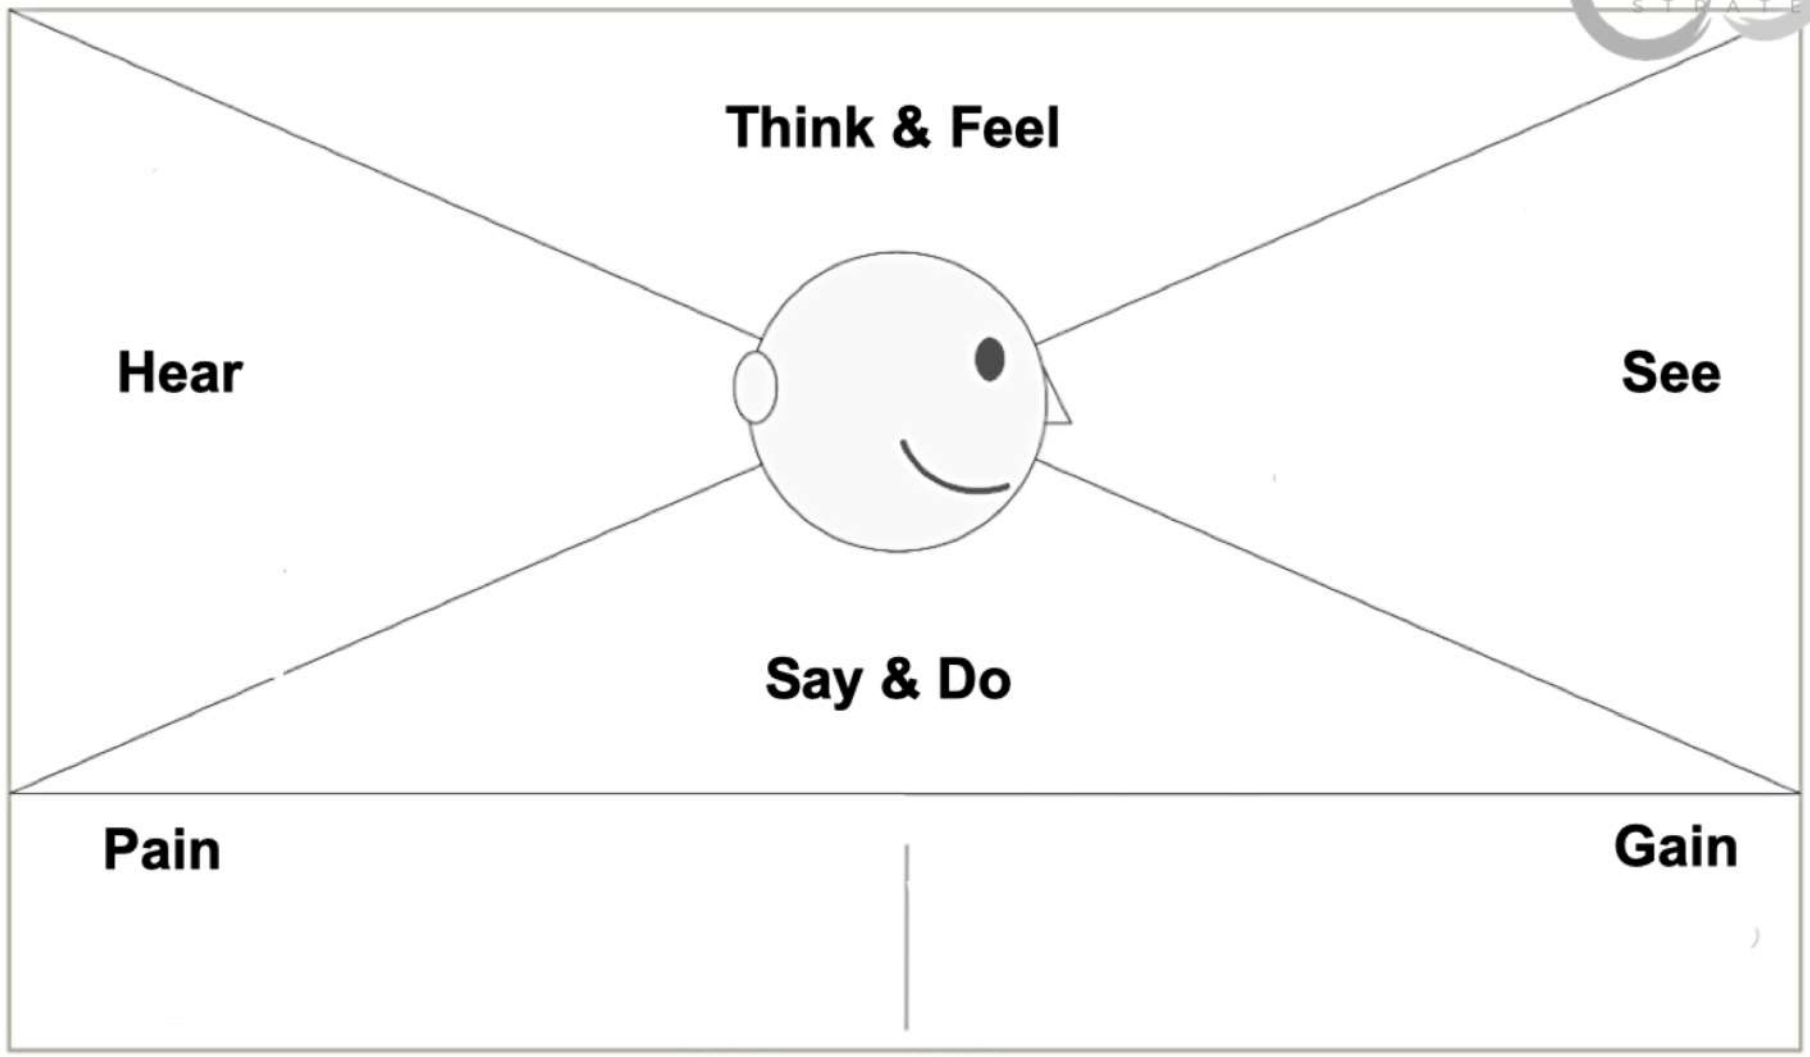

Define

The Empathy Map to Define the Job to Be Done for your Stakeholder(s)

1. Target group = stakeholder
2. Summarize your insights
3. Define the target group

Empathy Map

3

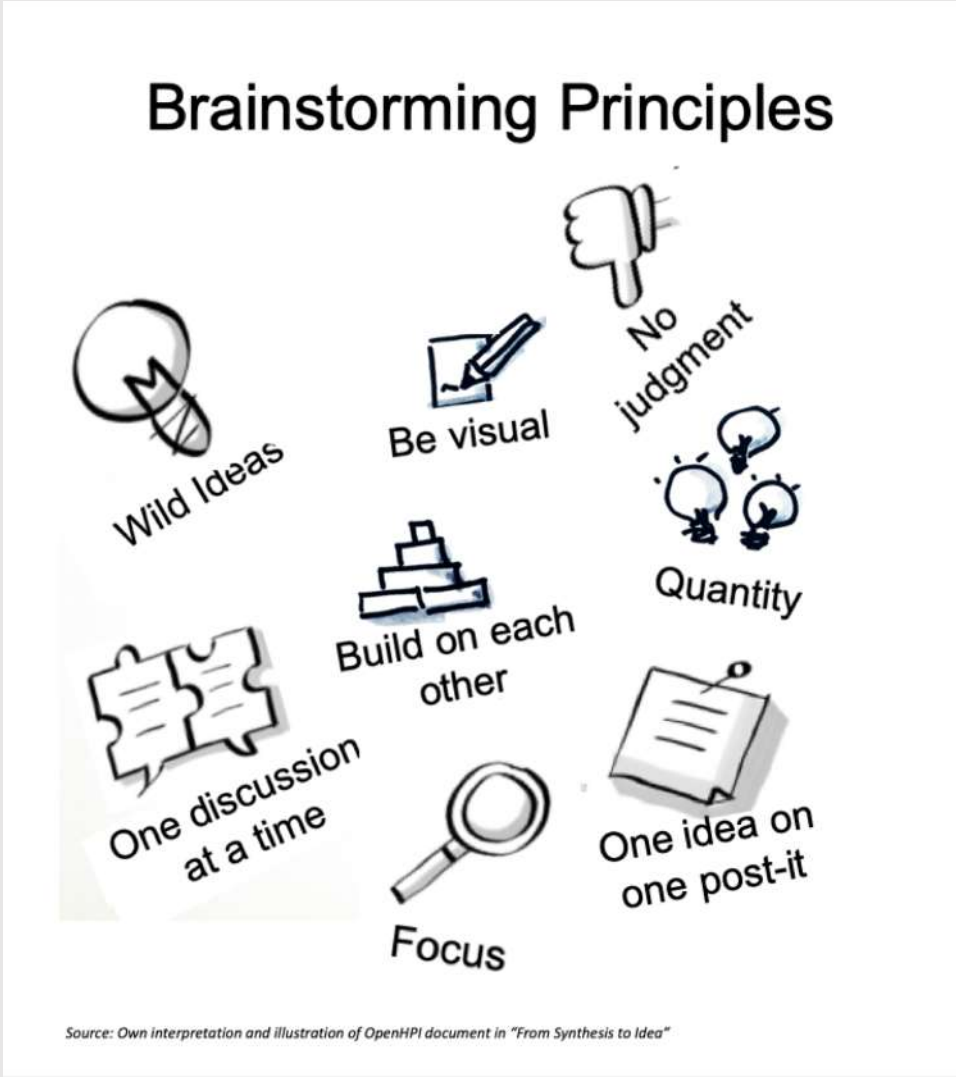

Ideate

Selected Creativity Methods

Silent Brainstorming

- Braindump
- Association
- Disney Method
- Plus 5

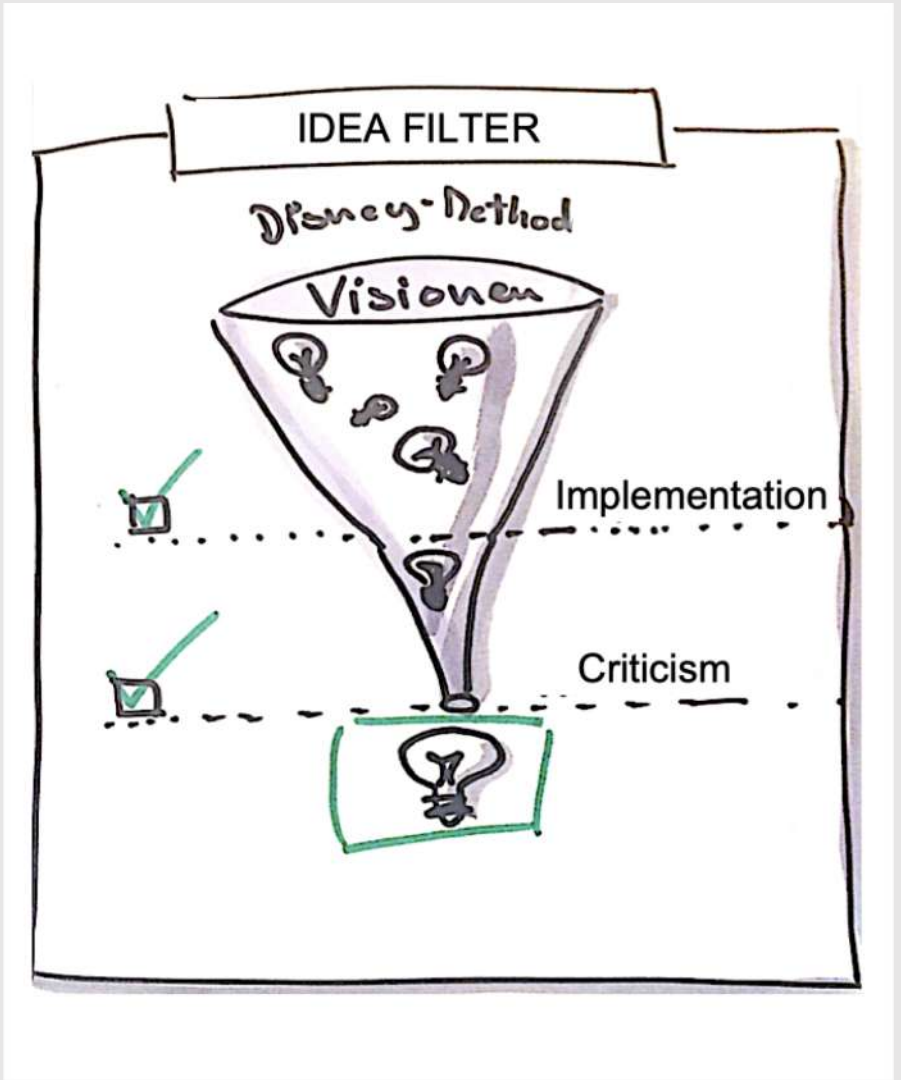

3

Ideate

Selected Sorting and Filtering Methods

1. Cluster
2. Voting
3. 2x2 Matrix (e.g. Now-Wow-How)
4. Idea filter (e.g. Disney)

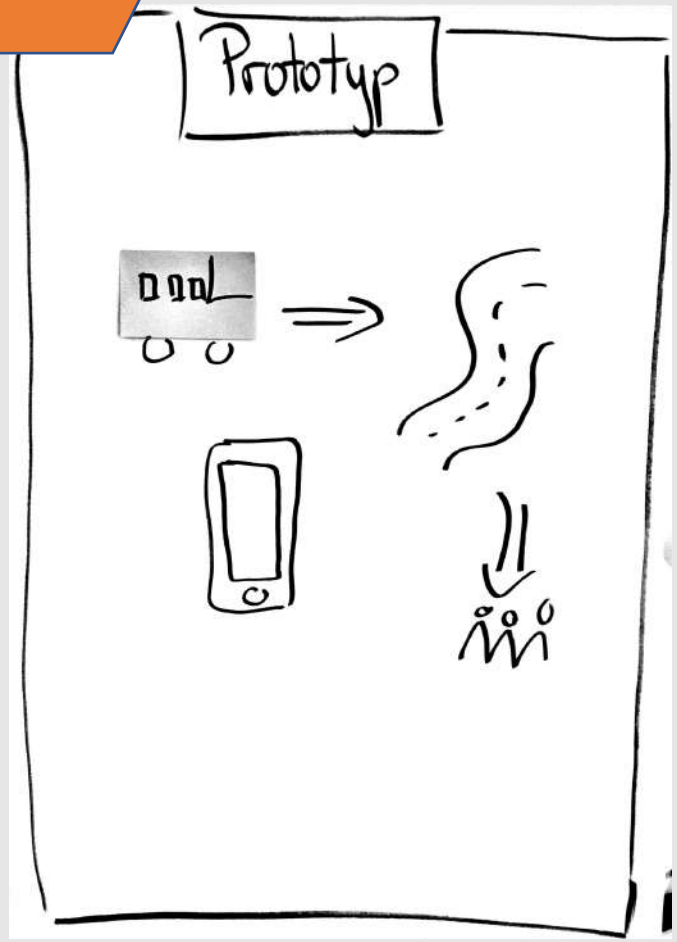

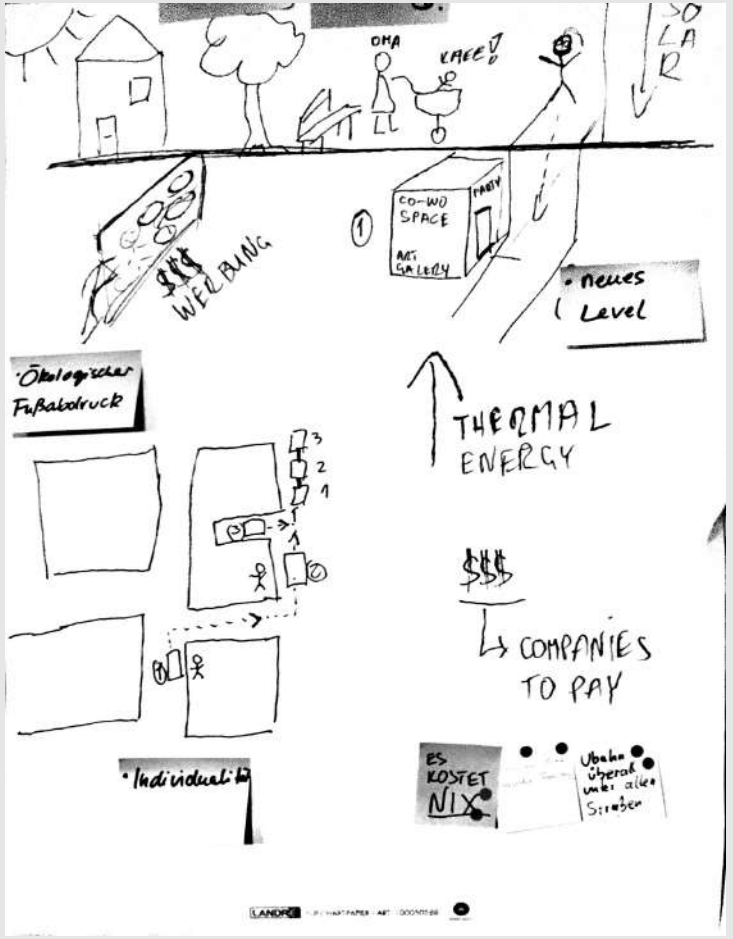

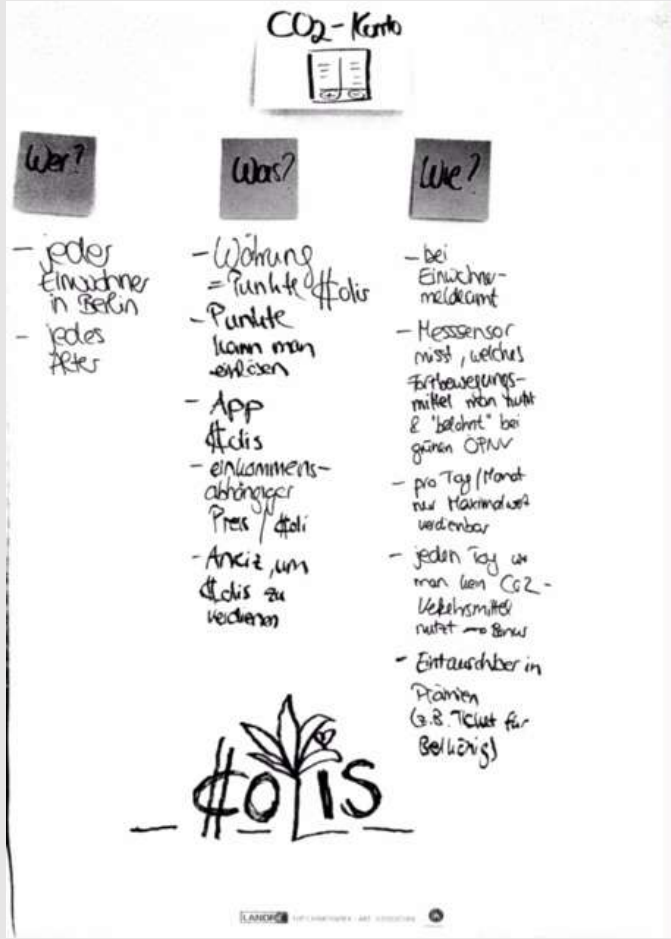

4

Prototype

Develop a Prototype / Concept

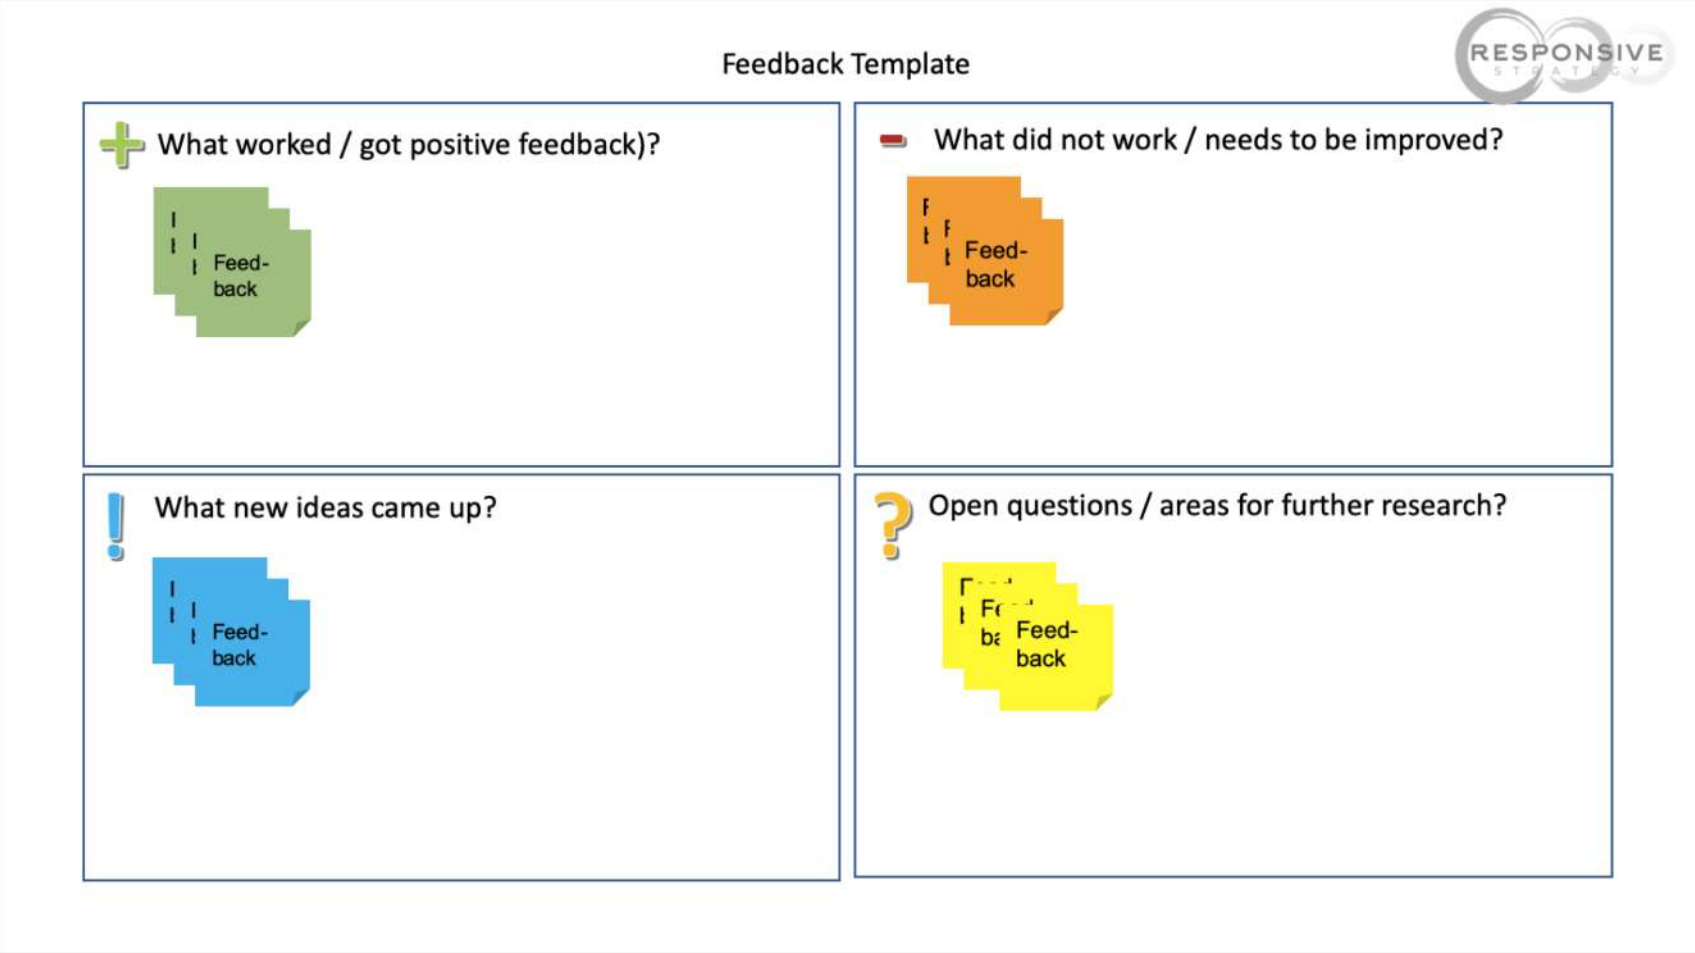

5

Test

Test with the Stakeholders and Collect Feedback

Thank you.
